

## Now Enrolling: Project Onramp Summer 2022 ([projectonrampma.com](http://projectonrampma.com))

Project Onramp creates paid summer internships for Massachusetts **college students** who are under-resourced and often from under-represented groups or first-generation -- helping to bridge the opportunity gap for these promising young people.

Project Onramp host companies commit or create internships for these high-performing students. You can set aside an established internship for Onramp candidates, or create new positions for Onramp to fill. Internships are not limited to STEM-related roles—we can match you with talented candidates with interest in business development, administration, HR, finance, IT, marketing, etc. We will send you several resumes for each internship position, and you will use your existing review and hiring processes to choose the student who best fits your needs.

Companies with fewer than 100 employees will have their intern's summer compensation (at a rate of \$17/hr.) reimbursed by the Massachusetts Life Science Center. There is no fee associated with being part of Project Onramp.

**If you are committed to creating a more diverse pipeline of students exploring careers at your company, please consider taking a Project Onramp intern next summer.**

Contact Lila Neel at [lila@lifesciencecares.org](mailto:lila@lifesciencecares.org) to discuss.

*Project Onramp is a partnership of Life Science Cares, MassBio, The Massachusetts Life Sciences Center, MassBioEd, MBI, Bottom Line, Clark University, Thrive Scholars and Minds Matter Boston.*
